Funcons-beta: Records *

The PLanCompS Project

Records.cbs | PLAIN | PRETTY

Records

A value of type records(T) contains a map from identifiers to values of type T.

```
Funcon \operatorname{record-map}(\_:\operatorname{records}(T)):\Rightarrow\operatorname{maps}(\operatorname{identifiers},T)

Rule \operatorname{record-map}(\operatorname{record}(M:\operatorname{maps}(\_,\_)))\leadsto M

Funcon \operatorname{record-select}(R:\operatorname{records}(T),I:\operatorname{identifiers}):\Rightarrow T^?

\leadsto \operatorname{map-lookup}(\operatorname{record-map}(R),I)
```
